DETAILED ACTION - ALLOWANCE

Reasons for Allowance

1. Claims 1-5 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided below in the paragraph which follows below.

2. The instant application is deemed to be directed to a nonobvious improvement over the invention of Lee (KR-2002085681-A) disclosed by applicant as being a representative example in the art to which the instant invention pertains. In particular, said improvement provides a miniaturized camera lens system for electronic imaging; in which both high resolution and low distortion are achieved through the use therein of a particular combination of aspherical lens surfaces and an object-side light stop, taken together in a particular refractive power arrangement described/distinguished by the three conditional relationships included in applicant's sole independent claim (Claim 1, Lines 16-18). The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Other Remarks/Information

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2873

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shinohara (US-6650485-B1) and Yamaguchi et al. (US-2004/0105173-A1) disclose other miniaturized camera lens system for electronic imaging which include aspherical lens surfaces and object-side light stops. These systems, however, do not satisfy the above-noted conditional relationships.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

6. Any other inquiry concerning this communication or earlier communications from the examiner should be directed to David N. Spector whose telephone number is (571) 272-2338. The examiner can normally be reached at this number Monday through Friday between 6:00 AM and 2:30 PM. The fax number for the organization where this application is assigned is (703) 872-9306.
